Waves of Becoming - From Fea to Sight

Waves of Becoming is a reflection of my inner waters — a space where energy, emotion, and form flow into one another. Working with thin, translucent layers of paint, I allow each piece to unfold like a tide — revealing botanical rhythms, divine figures, and submerged worlds that feel both ancient and alive.

Together, these works create an ecosystem of energy and emotion — delicate yet powerful, intuitive yet precise. They hold a pulse, a quiet music, echoing the cycles of growth, transformation, and the sacred unknown.

This series is a meditation on what it means to soften, to shift, and to become.
